

Sports High School was founded in 1991 and it is the only vocational school in Iași, Romania, that has a sports-oriented activity. It selects and trains more than 1,000 students, aged 10-19, developing their physical aptitudes and their knowledge in athletics, handball, football, rowing, judo, chess, fencing, etc.

Apart from the standard educational programme, the students have a daily training schedule that enables them to participate in local, national and world competitions. At the same time, besides the regular subjects, they also take a special course in Sports Training Theory that familiarizes them with various sports topics.

At the end of their studies, the students have the possibility to take a special examination for a sports instructor certificate, which consists in presenting a paper and a practical exam that varies with the sport they practice.

#### *Special interest in the project*

We believe that our educational offer should also add a European dimension, and, therefore, the experience acquired in this project will enable our teachers to provide the students with the necessary professional skills which will enable them to work within a common qualification framework.
